

Golang-Specific Concepts

Tom Arrell

January 6

Recap

Last decade. . .

- ▶ Scopes, global and local
- ▶ Arrays, fixed sized list of same-type things
- ▶ Slices, variable size array

Today

I'll take you through a tour of the Go-specific concepts, and how they work, and why they are useful.

This session will be intentionally light on slides.

Resources

We'll be going through two main resources today.

- ▶ Tour of Go: <https://tour.golang.org/welcome/1>
- ▶ Go by Example: <https://gobyexample.com>

lesson 4, fin

If you had any trouble, now is the time to ask for help!
